

Lyclear Dermal Cream

Uses

Treatment of scabies and crab lice.

Dosage

Scabies: Adults: apply up to 30g of cream. Children 6-12 years: apply up to 15g of cream. Children 2 months to 5 years: apply up to 7.5g of cream. Apply to clean, dry, cool skin. If a warm bath has been taken prior to treatment, the skin should be allowed to cool before the cream is applied. Wash whole body thoroughly 8-12 hours after treatment. Treatment in children aged 2 months to 23 months should be given under close medical supervision. Children below 2 months: not recommended. Crab lice: Over 18 years only: apply up to 30g of cream to cover the pubic region, peri-anal, inner thighs down to the knees and any hair that grows up from the pubic area to the chest/stomach. Wash whole body thoroughly 24 hours after treatment. Under 18 years: not recommended.
